

– Invitation –
**Young Investigator's Workshop
on Photon Detection for Medical Applications**

Dear colleagues from medical physics working on gamma ray or photon detectors for medical imaging

I am happy to announce that the most suitable time slot for the proposed workshop could be found. The event will take place at the University of Siegen, Germany,

Monday 2nd of December – Tuesday 3rd of December 2019.

The workshop is planned to last the whole two days. The details on the exact location within Siegen as well as the time table will be sent out as soon as all interested young scientists have signed up.

Although travel expenses and hotel costs would be on self-pay basis, financial support by the MediNet network is possible and could already be confirmed. Therefore, **no conference fee** will be collected from the participants.

As a quick reminder, the motto for workshop is: from young scientists for young scientists. Thus, it is important that everyone will get the chance to present their current work in a talk or through a poster. Enough time will be given to thoroughly discuss their work and results with all colleagues from other groups and also to get the input from more experienced scientists.

If you are interested in taking part, please send an e-mail to bayerlein@hep.physik.uni-siegen.de and give your name, institution, current topic of research or experiment and a short abstract of your contribution. This helps to prepare the time table in an orderly and reasonable manner. Please also state, if you are planning on giving a talk or preparing a poster. I am looking forward to receiving your e-mail by

30th of June 2019.

You will then receive further information on appropriate hotels and possible means of travel. Since the MedNet mailing list does not raise a claim on completeness I would kindly ask you to forward this invitation especially to the young members of your group or other institutes that you consider appropriate.

Please feel free to contact me with all your questions.

Best regards

M.Sc. Reimund Bayerlein
